

InventHelp Inventor Designs Modified Windshield Wipers (BGF-980)

InventHelp, a leading invention company, is submitting the BORCHARDT SAFETY WIPES to companies in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) November 13, 2015 -- An inventor, from West Branch, Mich., thought there needed to be an easier way to remove dirt, insects and debris from a vehicle's windshield, so he invented the BORCHARDT SAFETY WIPES.

The BORCHARDT SAFETY WIPES provide an effective way to clear dirt, debris and other obstructions from a vehicle's windshield. In doing so, they eliminate the need to manually clean the windshield with a rag or squeegee. As a result, they improve visibility and they enhance safety. The invention features a convenient design that is easy to use so it is ideal for vehicle owners. Additionally, the BORCHARDT SAFETY WIPES are producible in design variations and a prototype is available.

The inventor described the invention design. "My design enhances safety and visibility for drivers."

The original design was submitted to the Bingham Farms office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-BGF-980, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
