

InventHelp Inventor Designs Trailer Accessory (CVL-362)

InventHelp, a leading inventor service firm, is submitting the EXTEND A GATE to companies for their potential feedback.

PITTSBURGH, PA ([PRWEB](#)) November 17, 2015 -- “I have a 10 foot trailer with a gate but I needed to haul 18 foot planks,” said an inventor, from Girard, Ohio. “I thought there needed to be a way to enhance my trailer’s hauling capabilities, so I invented this.” He invented the patent-pending EXTEND A GATE.

The EXTEND A GATE offers an improved way to support and stabilize extended loads on trailers. In doing so, it ensures that lumber or other long materials can be safely transported. As a result, it enhances the hauling capabilities of a trailer and it provides added peace of mind. The invention features a durable and reliable design that is convenient and easy to use so it is ideal for trailer owners. Additionally, the EXTEND A GATE is producible in design variations.

The inventor described the invention design. “My design enables a trailer owner to haul longer loads of lumber and other materials.”

The original design was submitted to the Cleveland office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-CVL-362, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
