

InventHelp Inventors Design Decal Remover for Vehicles (DVR-902)

InventHelp, based in Pittsburgh, Pa., is submitting the STEAM & STRIP to applicable companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 18, 2015 -- Two inventors, from Denver, Colo., thought there needed to be an effortless way to remove vinyl lettering and decals from a vehicle, so they invented the STEAM & STRIP.

The patent-pending STEAM & STRIP offers a simple way to remove vinyl lettering and decals from a vehicle. In doing so, it eliminates the need to use harsh chemicals during removal and it eliminates the need to scrub and scrape. As a result, it saves time and effort. The invention features an effective design that is convenient and easy to use so it is ideal for businesses with company vehicles. Additionally, a prototype is available.

The inventors described their inspiration for the invention. “We were inspired to create this while working. We thought there needed to be a more effective way to remove the vinyl advertisements and lettering from the company van, so we invented this.”

The original design was submitted to the Denver office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-DVR-902, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
