

EASY HITCH GUIDE Invented by InventHelp Clients (LLF-136)

InventHelp, founded in 1984 in Pittsburgh, is submitting this idea, the EASY HITCH GUIDE, to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) November 23, 2015 -- Two inventors, from Frost Proof, Fla., wanted to cut down on the number of people required to align and connect a trailer to a truck, as well as cutting back the risk of damaging the bumper and tongue of the trailer, so they invented the EASY HITCH GUIDE.

The EASY HITCH GUIDE provides an improved way to align a truck and trailer hitch ball for easy connection. In doing so, it saves time and it eliminates the need for assistance. It also could help to prevent accidental damage. The invention features an effective design that is convenient and easy to use so it is ideal for trailer owners. Additionally, the EASY HITCH GUIDE is producible in design variations.

The inventor described the invention design. “Our design ensures that the truck and trailer hitch ball are aligned on the first try.”

The original design was submitted to the Lakeland office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
