

CONSOLE COMFORT Invented by InventHelp Clients (LGI-2147)

Based in Pittsburgh, Pa., InventHelp is submitting the CONSOLE COMFORT to applicable companies for their review.

PITTSBURGH, PA ([PRWEB](#)) August 20, 2016 -- Two inventors, from Flushing, N.Y., thought there needed to be a way to protect a driver's knee from hitting the car's console while driving, so they invented the CONSOLE COMFORT.

The CONSOLE COMFORT helps to prevent a driver's knee from bumping the car's console. In doing so, it provides added protection. As a result, it enhances comfort and it could help to reduce knee pain and discomfort. The invention features an adjustable design that is convenient and easy to use so it is ideal for taller drivers. It also helps to reduce wear in the console. Additionally, the CONSOLE COMFORT is producible in design variations.

The inventors described the invention design. "Our design offers added comfort and protection."

The original design was submitted to the Long Island office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-LGI-2147, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
