

Fire-Safety System for Vehicles Invented by InventHelp Clients (RIM-253)

InventHelp, a leading invention firm, is submitting the ON BOARD FIRE SUPPRESSION to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) August 25, 2016 -- Two inventors from Craigsville, Va., know how serious vehicle fires can be. Concerned about all the deaths caused by these fires, they decided that something must be done to prevent such tragedies.

To meet this need they designed the ON BOARD FIRE SUPPRESSION, a system that allows for quick action in the event of a vehicle fire. This helps prevent damage and fatality, as well as promotes safety and peace of mind. Easy to install and use, the system is compatible with all vehicles.

The original design was submitted to the Richmond office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-RIM-253, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
