

Inventor and InventHelp Client Develops Tire-Inflation Cage (TPA-2313)

Pittsburgh-based InventHelp is submitting the SAFETY TIRE CAGE to companies for their review and possible feedback.

PITTSBURGH, PA ([PRWEB](#)) September 19, 2016 -- "I am an automotive service technician, and I am responsible for inflating tires on a daily basis," said an inventor from Tampa, Fla. "It can be life-threatening if a tire explodes or there is zippering during the inflation process, which led me to develop this safety equipment."

He developed the SAFETY TIRE CAGE to secure the tire in position during the inflation process. The unit protects a service technician in the event that the tire explodes or there is zippering. This is designed to enhance personal safety. The invention offers added peace of mind. It is adaptable for use with different sizes of tires. Also, the unit features durable construction.

The original design was submitted to the Tampa office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-TPA-2313, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
