

## **InventHelp® Client Develops Seat Head Protection (AVZ-1377)**

*InventHelp, America's leading Inventor Service company, attempts to submit an invention, Seat Head Protection, to companies for review.*

Pittsburgh, PA ([PRWEB](#)) September 21, 2016 -- An inventor, from Axton, Va., thought there needed to be a way to prevent a child's head and neck from bobbing while sleeping in a car seat, so she invented the Seat Head Protection.

The Seat Head Protection provides an effective way to support a child's head while traveling. In doing so, it prevents a child's head from falling forward or to the side. As a result, it enhances comfort and it provides added safety. The invention features an adjustable design that is convenient and easy to use so it is ideal for parents of children ages 5 and younger. Additionally, the Seat Head Protection is producible in design variations.

The inventor described the invention design, "My design enhances safety, comfort and support for children."

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-AVZ-1377, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
