

Two InventHelp® Clients Develop Child Safety Seat Belt Invented (BGF-1049)

InventHelp, America's leading inventor service company, attempts to submit an invention, Child Safety Seat Belt, to companies for review.

Pittsburgh, PA ([PRWEB](#)) September 21, 2016 -- InventHelp, America's leading inventor service company, attempts to submit an invention, Child Safety Seat Belt, to companies for review.

“My two-year-old is an escape artist,” said one of two inventors, from Clinton Township, Mich. “We thought there needed to be a quick and effective way to warn parents if a child unbuckles his or her seat belt, so we invented the Child Safety Seat Belt.”

The Child Safety Seat Belt provides an effective way to notify parents if a child unbuckles his or her car seat. It also ensures that a child’s car seat is properly buckled. As a result, it enhances safety and it provides added peace of mind. The invention features a user-friendly design that is convenient and easy to use so it is ideal for parents of young children and toddlers. Additionally, the Child Safety Seat Belt is producible in design variations.

The inventors described the invention design. “Our design provides added protection for children and parents.”

The original design was submitted to the Bingham Farms office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BGF-1049, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
