

Inventor Develops Vehicle Accessory for Inclement Weather (NAV-824)

InventHelp is working to submit this client's idea, the DROP TECH, to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) September 24, 2016 -- "I hate when I leave the windows down in my car, and then it rains before I have a chance to run out and put them up," said an inventor from Nashville, Tenn. "This is why I came up with a system to ensure that rainwater does not end up ruining the interior."

He developed the DROP TECH to prevent rain from soaking the interior of a parked vehicle. The system keeps the interior safe and protected from inclement weather. This ensures that the vehicle remains in pristine condition. It offers added peace of mind to vehicle owners. In addition, the invention is adaptable for use with any new or existing vehicle, and it is designed for ease of use.

The original design was submitted to the Nashville office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NAV-824, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
