

## **InventHelp® Client Develops Advertising for Use on Commercial Trucks (CIC-133)**

*An Illinois-based InventHelp client has invented the Rolling Billboard, which is being submitted to companies for review.*

Pittsburgh, PA ([PRWEB](#)) September 29, 2016 -- "I thought that the sides of large commercial trailers could be used for advertising purposes," said an inventor from Hazel Crest, Ill. "This realization led me to develop an exciting way to promote goods and services using these commercial vehicles."

He developed the patent-pending Rolling Billboard to turn the sides of a large commercial trailer into usable advertising space. The system offers an ideal way to promote goods and services. It features an attention-getting design that attracts the gazes of other motorists and pedestrians. The invention can generate additional streams of revenue for trucking companies and drivers. Additionally, it features a variable design that can accommodate virtually any product or service.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CIC-133, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
