

MILL BOARD Invented by InventHelp Client (FED-1629)

A leading invention company, InventHelp is submitting the MILL BOARD to interested companies for their review.

PITTSBURGH, PA ([PRWEB](#)) October 05, 2016 -- An inventor, from Olympia, Wash., thought there needed to be a clear way for drivers to share messages, so he invented the MILL BOARD.

The MILL BOARD provides an effective way to communicate with fellow motorists while traveling. In doing so, it ensures that a message is communicated clearly and it offers an alternative to traditional paper bumper stickers. As a result, it could enhance safety. The invention features an adjustable design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the MILL BOARD is producible in design variations.

The inventor described the invention design. “My design could help to prevent miscommunications between drivers.”

The original design was submitted to the Seattle office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-FED-1629, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
