

Enhance Appearance of a Vehicle With R.A.K. - Designed by InventHelp Clients (KPD-336)

Based in Pittsburgh, Pa., InventHelp is submitting the R.A.K. to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) October 09, 2016 -- There are many ways to detail a vehicle, but people who take pride in their cars and trucks tend to want to make them stand out in a unique manner that shows off their particular style and draws attention. "This inspired us to design a kit that allows for a new way to modernize and enhance the look of vehicles," said one of two inventors from Coplay, Pa.

The result of their inventiveness is the patent-pending R.A.K., a kit that allows for the unique enhancement and modernization of a vehicle's appearance. It increases the vehicle's visibility and attractiveness, making it much more noticeable than conventional vehicles. This also promotes safety.

Versatile, easy to use, stylish and producible in many design variations, including an OEM version, the kit is ideal for car enthusiasts and vehicle collectors.

The original design was submitted to the King of Prussia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-KPD-336, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
