

Two InventHelp® Client's Invention Protects the Pelvic Area in Vehicle Accidents (CBA-2931)

InventHelp, America's leading inventor service company, attempts to submit an invention, Pelvic Cushion Protector, to companies for review.

Pittsburgh, PA ([PRWEB](#)) October 14, 2016 -- Many victims have their pelvic bones broken in car accidents since there is no protection in that area. This inspired two inventors from Ridgeville, S.C., to design a protective accessory for drivers and passengers.

The Pelvic Cushion Protector is an invention that provides protection for a user's midsection and pelvis during a vehicle accident. This helps prevent the pelvic bones from being broken. It also provides protection for the shoulder and chest if used in that capacity. The invention is designed to avoid injury or fatality, which promotes safety and peace of mind. Easy to use and producible in different sizes and colors, it's compatible with all vehicles.

The original design was submitted to the Columbia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CBA-2931, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
