

## **Automobile Accessory Invented by InventHelp Client (LAX-746)**

*A Pittsburgh-based invention firm, InventHelp is submitting the PORTABLE TABLE FOR CAR to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) October 11, 2016 -- An inventor from Lancaster, Calif. wanted a way to more easily do work and eat food while in an automobile. To that end, he invented the PORTABLE TABLE FOR CAR, a device that would enable the user to quickly and efficiently eat or work while in a motor vehicle.

The PORTABLE TABLE FOR CAR would be a durable device that could be used by any motorist. It would utilize a unique design to quickly and easily supply the user with a table surface. It would also be lightweight, compact, and easily portable to allow it to be easily transported or stored away.

The inventor was inspired by trying to eat while vehicle was parked. "I spilled Chinese food that I was eating in my car," said the inventor. "I decided to create a device that would allow the user to easily eat in a car."

The original design was submitted to the Los Angeles office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-LAX-746, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
