

Inventor and InventHelp Client Develops Snow-Clearing Tool for Truck Drivers (NJD-1173)

Founded in 1984 in Pittsburgh, InventHelp is submitting the SNOW TOP REMOVAL SYSTEM to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) October 15, 2016 -- "As a truck driver, I saw the need for a better, safer way to clear snow off the rooftops of my truck and trailer," said an inventor from Elizabeth, N.J. "In order to get the job done more quickly and easily, I came up with the idea for this easy-to-use tool."

He developed the patent-pending SNOW TOP REMOVAL SYSTEM to offer a convenient means of removing snow from the top of a large commercial truck or trailer. The tool allows the task to be completed while the driver is standing on the ground. The design eliminates the need to climb atop the vehicle to remove snow. This is designed to enhance physical safety. It saves time and effort, and eliminates hassles and frustrations. Furthermore, the invention is easy to use.

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NJD-1173, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
