

Car Accessory Invented by InventHelp Clients (OCC-1064)

Founded in 1984 in Pittsburgh, InventHelp is submitting the MAGNIA-VIEW to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) October 15, 2016 -- A pair of inventors from Corona, Calif. wanted a way to more easily see the dashboard of a vehicle. To that end, they invented the MAGNIA-VIEW, a device that would enable the user to easily see all dashboard lights and instruments brighter and bigger.

The MAGNIA-VIEW would be a durable device that could be used by any motorist. It would utilize a unique design that could fit any vehicle. It would also be lightweight, compact, and easily removed. It is so easy to install and requires no custom installation. "You buy it, you install it, you drive off," said one inventor.

The inventors were inspired by trying to see the car dashboard. "We sometimes had trouble reading the dashboard instrumentation," said the inventors. "We decided to create a device that would make the dashboard easier to see. There are no batteries, no screwdrivers, no need to spend your time paying an installer. It installs in minutes with no tools needed."

The original design was submitted to the Orange County office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-OCC-1064, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
