

## **Two InventHelp Client's Invention, DOZIN BUDDY, Provides Head Support for Child Vehicle Passengers (BGF-1094)**

*Two Birmingham-based InventHelp clients have invented the Dozin Buddy, which is being submitted to companies for review.*

Pittsburgh, PA ([PRWEB](#)) October 26, 2016 -- Two inventors from Birmingham, Mich., are concerned about children who fall asleep while riding in vehicles. "Every time my daughter would fall asleep in the car her head would droop over due to lack of support," said one inventor. "This inspired me to develop a way to avoid this problem and optimize comfort for child vehicle passengers."

They then created a prototype of and acquired a patent for the Dozin Buddy, a device that provides more support for a child's head if he or she falls asleep in a toddler car seat. It prevents the head from drooping forward or to the side, which avoids neck strain and/or pain. Overall, the device promotes comfort and rest.

Adjustable and compatible with most toddler seats, the device can be produced in different colors.

Idea is listed under U.S. Patent #8141955, other patents are pending, and there's a finished product available. For more information visit [www.dozinbuddy.com](http://www.dozinbuddy.com).

The original design was submitted to the Bingham Farms office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BGF-1094, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
