

## **License Plate Accessory Invented by InventHelp Client (FLA-2707)**

*Based in Pittsburgh, Pa., InventHelp is submitting the CLEAR PLATE to companies in the hopes of their good faith review.*

PITTSBURGH, PA ([PRWEB](#)) October 25, 2016 -- An inventor from Lake Elsinore, Calif., wanted to find a way to show off the rear license plate for motorcycles. As such, they invented the patented CLEAR PLATE for use by motorcyclists, motorcycle riding enthusiasts and operators of scooters and mopeds.

The inventor was inspired by their own experience with motorcycles. “I wanted to develop a way to accessorize and customize a motorcycle in an attractive and eye-catching manner.” The invention serves as an impressive and appealing means of showing off the rear license plate.

The CLEAR PLATE improves the appearance of a formerly dull and lifeless rear license plate and attracts immediate attention from others. While it is ideally suited for motorcycles, it could be used with some ATVs that might require licensing and use smaller tags.

The original design was submitted to the Fort Lauderdale office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-FLA-2707, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
