

## **Avoid Leaving Children Behind in Vehicles With KIDLIFE - Designed by InventHelp Client (HLW-1663)**

*Based in Pittsburgh, Pa., and founded in 1984, InventHelp is submitting the KIDLIFE to companies for review.*

PITTSBURGH, PA ([PRWEB](#)) October 26, 2016 -- When children are left behind in a vehicle, they are at risk of fatality due to heat stroke or hypothermia. This inspired an inventor from Miami, Fla., to think of a reliable way to optimize child safety in vehicles. "In order to help reduce these tragedies, I conceived of this precautionary system," he said.

KIDLIFE provides a way to avoid leaving children behind in vehicles. It helps save them from fatality due to heat stroke or hypothermia. As a result, it promotes peace of mind by eliminating the worry of making a tragic mistake. The invention is easy to use and compatible with all vehicles, which should incentivize parents and guardians of children to take this extra precaution.

The original design was submitted to the Hollywood office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HLW-1663, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
