

Protect Parked Vehicles With PREVENT DENT TECHNOLOGY - Designed by InventHelp Client (SUU-351)

A leading invention submission company, InventHelp is submitting the PREVENT DENT TECHNOLOGY to companies for their review.

Pittsburgh, PA ([PRWEB](#)) January 12, 2017 -- After seeing new cars getting dented and tired of finding dents in the side of his car when parking in lots, an inventor from Godfrey, Ill., decided that there should be a reliable way to prevent this expensive damage from happening.

The PREVENT DENT TECHNOLOGY provides optimal protection for the side of a parked vehicle. This prevents dents that result in damage, which eliminates the need for expensive repair, which saves money.

Ergonomic, easy to use, compatible with all kinds of vehicles, and producible in different sizes, colors and materials, the PREVENT DENT TECHNOLOGY is designed to promote safety and peace of mind. Furthermore, it helps prevent theft. It can display advertisements and logos as well.

The original design was submitted to the Salt Lake City office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SUU-351, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
