

InventHelp® Client Develops Specialized Cargo Rack for Golf Carts, Etc. (CBA-2799)

A South Carolina-based InventHelp client has invented the Caddy Rack, which is being submitted to companies for review.

Pittsburgh, PA ([PRWEB](#)) November 03, 2016 -- "I needed extra space on my golf cart so that I could bring along a cooler and chairs and some other supplies," said an inventor from Gilbert, S.C. "I came up with this idea so that golf carts and other small vehicles can carry additional cargo."

He created a prototype for the Caddy Rack to allow additional cargo to be transported with ease. The unit frees up space on the vehicle and increases the load capacity of the vehicle. The device features a lightweight, space-saving, sturdy, stable design. Furthermore, the accessory is easily adaptable for use on golf carts, ATVs and UTVs, and it's easily stored when not in use.

The original design was submitted to the Columbia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CBA-2799, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
