

## **Keep Newborns Safer in Vehicles With EASY ALERT - (NJD-1210)**

*InventHelp, based in Pittsburgh, Pa., is submitting the EASY ALERT to appropriate companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) November 02, 2016 -- As a proud parent of newborn twins an inventor from Staten Island, N.Y., was especially concerned about their safety when riding in the car. He thought that there needed to be a reliable way to let other drivers know that newborns are present in other vehicles so that they can think twice about driving recklessly. That's when he came up with the patent-pending EASY ALERT.

This invention helps enhance the safety of a newborn or newborns while riding in a vehicle. It alerts other drivers to remind or encourage them to drive more carefully. As a result, it helps prevent reckless driving that could result in injury or fatality of the baby or babies, which promotes peace of mind.

The EASY ALERT features an easy-to-install/use design, is compatible with all vehicles, and can be added to existing vehicles or built into new vehicles.

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NJD-1210, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
