

## **Electronic Baby Sign Invented by InventHelp Client (OCC-1109)**

*A leading invention company, InventHelp is submitting the Electronic Baby Sign to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) November 02, 2016 -- An inventor, from Santa Ana, Calif., thought there needed to be a better way to notify drivers when a baby is on board, so he invented the Electronic Baby Sign.

The Electronic Baby Sign provides an effective way to alert others when a baby is traveling in a vehicle. In doing so, it offers an alternative to traditional bumper stickers. As a result, it could enhance safety and it provides added peace of mind. The invention features a user-friendly design that is convenient and easy to use so it is ideal for the parents of young children. Additionally, the Electronic Baby Sign is producible in design variations.

The inventor described the invention design. “My design provides a more effective alternative to window and bumper stickers.”

The original design was submitted to the Orange County office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-OCC-1109, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
