

## **Tool Eases Multiple Tasks for Truck Drivers - Designed by InventHelp Clients (OCC-1116)**

*A leading inventor service company, InventHelp is working to submit the RHINO HAMMER to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) November 02, 2016 -- As a truck driver one of two inventors from Long Beach, Calif., needs to take care of multiple tasks on a daily basis, and this requires a lot of tools and effort. In order to make things easier and less strenuous, he and the co-inventor decided to develop a new kind of tool.

The patent-pending Rhino Hammer enables a truck driver to perform a variety of tasks in a more convenient manner. It eliminates the need for multiple tools. As a result, it promotes efficiency and productivity. Ergonomic, versatile, compact and easy to use, it provides extra support and leverage when opening container doors, pulls out unwanted nails, helps torque loads, helps pull the 5th-wheel arm and aids in hammering.

In addition, the tool can help for dock workers, longshoremen, cargo loaders, construction workers, etc.

The original design was submitted to the Orange County office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-OCC-1116, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
