

Inventor and InventHelp Client Designs Alternative Wood Stove Installation for Trailers (POO-188)

InventHelp is attempting to submit the WOOD STOVE INSTALLATION KIT FOR UTILITY/TOY HAULERS to companies for review.

PITTSBURGH, PA ([PRWEB](#)) November 05, 2016 -- Many owners of ramp-style utility trailers like to have the comfort and convenience of wood stove, but installing them requires a lot of work and alteration. "I wanted to install a wood stove in my trailer, but I didn't want to spend the time and energy making such a permanent change," said one of two inventors from Warrenton, Oregon. "My design was a result of seeking an alternative to the conventional installation method."

Producible in design variations, the WOOD STOVE INSTALLATION KIT FOR UTILITY/TOY HAULER TRAILERS enables a user to install a wood stove in a utility trailer in a more convenient, less intrusive manner. It eliminates the need to cut holes and make permanent changes. As a result, it saves time and effort. It also provides a warmth of dry heat inside the trailer.

The inventor has created a prototype of his idea.

The original design was submitted to the Portland office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-POO-188, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
