

## **RED FLAG ALERT Invented by InventHelp Client (SAH-1094)**

*InventHelp is attempting to submit the RED FLAG ALERT to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) November 06, 2016 -- An inventor, from Durham, Calif., thought there needed to be a way to enhance safety for drivers and emergency vehicles, so he invented the RED FLAG ALERT.

The RED FLAG ALERT provides an effective way to alert drivers of approaching emergency vehicles. In doing so, it ensures that drivers have time to react and yield. As a result, it enhances safety and peace of mind and it could help to reduce EV related accidents. The invention features a reliable design that is convenient and easy to use so it is ideal for emergency services and vehicle owners. Additionally, the RED FLAG ALERT is producible in design variations.

The inventor described the invention design. “My design offers an improved way to notify drivers when emergency vehicles are approaching.”

The original design was submitted to the Sacramento office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SAH-1094, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
