

InventHelp Inventor Designs Better Way to Evaluate Inventory for Professional Moving Jobs (SKC-174)

A leading inventor service company, InventHelp is submitting the MOVING INVENTORY EQUIPMENT to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 06, 2016 -- After experience in working for large moving companies and finally starting a moving company of his own, an inventor from Tallahassee, Fla., knows what is necessary for achieving and maintaining efficiency for moving jobs. "I designed this device to make jobs easier for movers and more convenient for customers," he said.

MOVING INVENTORY EQUIPMENT allows moving jobs to be done in a more streamlined manner by easing tracking of inventory. It provides an exact price for customers directly after surveying inventory. It also helps movers know exactly how to load and unload moving trucks, which saves time, effort and labor. In addition, it avoids Department of Transportation fines for overweight moving trucks.

Ergonomic, convenient and easy to use, MOVING INVENTORY EQUIPMENT is ideal for all professional moving companies.

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SKC-174, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
