

ADAMSON SCRAPER Invented by InventHelp Clients (TOR-9582)

Based in Pittsburgh, Pa., InventHelp is attempting to submit the ADAMSON SCRAPER to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 07, 2016 -- Two inventors, from Hamilton, Ontario, Canada, thought there needed to be an easier way to remove ice from a vehicle's windows, so they invented the patent-pending ADAMSON SCRAPER.

The ADAMSON SCRAPER provides a quick and efficient way to remove ice, frost and snow from a vehicle's windows. In doing so, it offers a more effective alternative to traditional ice scrapers. As a result, it saves time and effort. The invention features a user-friendly design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the ADAMSON SCRAPER is producible in design variations and a prototype model is available upon request.

The inventors described the invention design. "Our design eliminates the hassles and frustrations associated with scraping ice. It moves the ice and snow toward you instead of pushing them to the opposite side."

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-TOR-9582, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
