

InventHelp Inventor Develops Improved Sound System for Automobiles (VET-376)

InventHelp is submitting this idea, the RECORD N GO, to companies for their consideration and potential feedback.

PITTSBURGH, PA ([PRWEB](#)) November 08, 2016 -- "I listen to the radio when I drive around, and sometimes I hear a commercial that has a phone number I need, and I want to be able to write the number down," said an inventor from Las Vegas, Nev. "Also, sometimes I want to listen to a song repeatedly. My invention makes this possible."

She developed the RECORD N GO to provide more complete control over the sound system. The system allows audio content to be recorded quickly and easily. The device keeps the driver from being distracted by the sound-system controls. It helps reduce the risk of collisions, which is designed to enhance automotive safety by promoting alertness. Furthermore, the invention is adaptable for use with any new or existing vehicle.

The original design was submitted to the Las Vegas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-VET-376, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
