

Inventor Develops Hassle-Free Mud Flap for Trucks (DLL-3050)

InventHelp is working to submit the BG-2 QUICK SNAP to companies for their possible consideration and feedback.

PITTSBURGH, PA ([PRWEB](#)) November 10, 2016 -- "If a mud flap is dislodged from a truck, the driver then has to go to a shop in order to get the flap replaced," said an inventor from Clarksville, Texas. "This is both time-consuming and costly. As a solution, I devised a mud flap that can be installed and removed in a snap."

She developed the BG-2 QUICK SNAP to be easy to install and remove. The mud flap does not require the use of bolts or screws. This design promotes the use of mud flaps, which reduce the risk of debris being thrown back into the path of other motorists. The invention also eliminates the need to pay for professional installation in the event that a mud flap needs to be replaced. This saves time and effort, enabling the driver to get back on the road quickly. Furthermore, the device provides added peace of mind.

The original design was submitted to the Dallas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-DLL-3050, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
