

## **Automotive Accessory Invented by InventHelp Client (HTM-3286)**

*InventHelp is submitting the HEATED ICE SCRAPER to companies in the hopes of our good faith review.*

PITTSBURGH, PA ([PRWEB](#)) November 12, 2016 -- An inventor from Thief River Falls, Minn. wanted a way to more easily protect his vehicle from snow and frost. To that end, he invented the patent-pending HEATED ICE SCRAPER, a device that would enable the user to quickly and efficiently remove snow and ice from a motor vehicle.

The HEATED ICE SCRAPER would be a durable device that could be used by any motorist. It would utilize a unique design to quickly and easily allow the motorist to clear the vehicle. It would also be lightweight, compact, and easily stored.

The inventor was inspired by trying to clear ice from his car. "I was tired of the time and hassle it took to scrape my car," said the inventor. "I decided to create a device that would allow the user to easily remove snow and ice."

The original design was submitted to the Telemarketing office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HTM-3286, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
