

InventHelp Inventor Develops Convenient Flat-Tire Fix (HUN-189)

Based in Pittsburgh, Pa., InventHelp is submitting the SPARE TIRE INSERTS to appropriate companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 13, 2016 -- "I have had to change flat tires under precarious conditions along the roadside," said an inventor from Houston, Texas. "Many people have been injured, maimed or killed while changing their tires. I thought up a way to allow a tire to be used until it can be changed in a safer situation."

He developed the patent-pending SPARE TIRE INSERTS to allow a punctured tire to be driven on until it can be changed safely. The invention eliminates the need to change a flat tire on the side of a dangerous roadway. The unit reduces the risk of being struck by a vehicle while changing a tire. It is designed to enhance personal safety by minimizing the risk of injury. The accessory offers added peace of mind. Additionally, it is adaptable for use with virtually any motor vehicle.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HUN-189, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
