

## **Inventor and InventHelp Client Develops Aid for Motorists (LAX-764)**

*InventHelp is attempting to submit the VEHICLE MESSAGE BOARD to appropriate companies in the hopes of their good faith review.*

PITTSBURGH, PA ([PRWEB](#)) November 13, 2016 -- "I backed up into a car because I did not look back to see where I was driving," said an inventor from Pasadena, Calif. "To keep myself from doing this again, I put a handwritten note on my steering wheel to remind me to look where I was going. This led me to my invention idea."

He developed the patent-pending VEHICLE MESSAGE BOARD to enable a driver to write erasable messages to him- or herself. This helps to promote safer, more responsible driving. It is designed to reduce the risk of accidents and collisions. This offers added peace of mind. In addition, the device can also be used to remind the driver to perform important tasks and is adaptable for use in any vehicle.

The original design was submitted to the Los Angeles office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-LAX-764, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
