

## **Inventor and InventHelp Client Develops Improved Automotive Tinting for Windows (MTN-1708)**

*InventHelp is attempting to submit this idea, the AUTO SHADE, to applicable companies for their review and possible consideration.*

PITTSBURGH, PA ([PRWEB](#)) November 15, 2016 -- "I thought that modern technology could be put to good use in developing better tinting for automotive windows," said an inventor from Brooklyn, N.Y. "My idea provides the optimal level of tinting for any situation."

He developed the AUTO SHADE to offer effective protection from bright sunlight. The windows reduce glare so that the driver can see clearly. The tinting protects the upholstery and interior from the harmful rays of the sun. The design enables the driver to adjust the tint level to meet the specific conditions. It allows the windows to be darkened to shield the interior from view while the vehicle is parked. In addition, the invention is adaptable for use with virtually any motor vehicle.

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-MTN-1708, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
