

Inventor and InventHelp Client Develops Trucking Safety System (MWK-150)

InventHelp, a leading invention firm, is submitting this idea, the TIRE SAVER, to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) November 15, 2016 -- "I am a truck driver, and I have had to change many flat tires along the side of the road on brutally cold winter and hot summer days," said an inventor from Machesney Park, Ill. "I thought that there had to be a better way to avoid getting flats in the first place, which led me to develop this preventative system."

He developed the patent-pending TIRE SAVER to ensure that the roadway is free of hazards that could damage the tires. This avoids flat tires, which speeds up travel time and saves money on costly tire repairs. It leaves the roadway in good condition for other motorists. The system saves the driver from having to pull over as frequently in order to change flat tires, which offers added peace of mind. Additionally, it is adaptable for use on both new and existing semi-trucks.

The original design was submitted to the Milwaukee office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-MWK-150, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
