

InventHelp Client's Device Makes Clearing Snow and Ice From Roads Easier (OLC-122)

InventHelp is working to submit this idea, the STREET HEATER, to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) November 17, 2016 -- An inventor from Oklahoma City, Oklahoma, wants to streamline the important task of clearing snow and ice from roads. "I created this device to help prevent injuries and save lives, to boost the economy and promote business," he said. "Now the worry about laborious shoveling and salting can be a thing of the past."

The STREET HEATER provides an alternative way to clear snow-/ice-covered roads. It eliminates the need to plow and pile snows, which saves time and effort. It also contributes to fresh groundwater supplies.

Most important, STREET HEATER promotes safety and helps prevent injuries and fatalities. Featuring an ergonomic, easy-to-use design, it can be produced in versions for airports and railroads.

The original design was submitted to the Oklahoma City office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-OLC-122, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
