

## **Modified Snow Removal Device Invented by InventHelp Client (CPC-141)**

*InventHelp is working to submit this idea, THE ONYX, to appropriate companies for their review and potential feedback.*

PITTSBURGH, PA ([PRWEB](#)) November 25, 2016 -- An inventor, from Rocky Hill, Conn., thought there needed to be a safer way to remove snow from the roads, so she invented THE ONYX.

THE ONYX provides an effective way to clear snow covered roads. In doing so, it offers an improved alternative to traditional snow clearing methods. As a result, it enhances safety and it eliminates snow blocked sidewalks and driveways. The invention features a durable design that is convenient and easy to use so it is ideal for snow removal services. Additionally, THE ONYX is producible in design variations.

The inventor described the invention design. “My design prevents plowed snow from piling up on the side of the road.”

The original design was submitted to the Connecticut office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CPC-141, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
