

Keep Food Warm and Fresh During Road Travel With TRAVEL SAVERS - Designed by InventHelp Client (DHM-204)

Pittsburgh-based InventHelp is submitting the TRAVEL SAVERS to companies for their possible consideration.

PITTSBURGH, PA ([PRWEB](#)) November 25, 2016 -- After the experience of having to cook for tailgating parties and struggle to transport unstable supplies of food that are hard to keep warm for very long, an inventor from Greenville, N.C., decided that there should be a better way to prepare and serve food in outdoor situations and while away from home. "That's when I started to develop this idea," he said.

The TRAVEL SAVERS is a device that provides a more convenient way to keep food warm and fresh while traveling on the road. It also keeps the food stable and avoids messes. This streamlines meal preparation and serving, which saves time and effort.

Compact, versatile, lightweight, durable and easy to use, the TRAVEL SAVERS serves as an alternative to stopping at a deli or restaurant, and it's beneficial for a wide variety of away-from-home food-serving situations.

The original design was submitted to the Raleigh/Durham office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-DHM-204, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
