

EASY D BLOCK Invented by InventHelp Client (NJD-1242)

InventHelp, founded in 1984 in Pittsburgh, is submitting the EASY D BLOCK to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 30, 2016 -- An inventor, from Teaneck, N.J., thought there needed to be a way to get instant tire traction when stuck in a slippery rut, so he invented the EASY D BLOCK.

The EASY D BLOCK provides an effective way to dislodge a vehicle stuck in snow, ice or another slippery surface. In doing so, it helps to prevent the wheels from spinning. As a result, it enhances safety and traction and it saves time and effort. The invention features a portable design that is convenient and easy to use so it is ideal for motorists. Additionally, the EASY D BLOCK is producible in design variations.

The inventor described the invention design. “My design offers a safe and easy way to dislodge a vehicle stuck in the snow.”

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NJD-1242, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
