

InventHelp Client's System Invented for Warning Drivers of Automobile Lighting Problems (SAH-1122)

InventHelp is working to submit the 1 OF YOUR LIGHTS R OUT to companies in the hopes of their good faith review.

PITTSBURGH, PA ([PRWEB](#)) December 02, 2016 -- It's not uncommon for one driver to warn another driver that one or more your lights are not on. Until now, though, the only way to do this was by hand signals or flashing lights. Fortunately, an inventor from Sacramento, Calif., has found a better tool for this type of driver-to-driver communication.

He developed the patent-pending 1 OF YOUR LIGHTS R OUT to alert drivers that their vehicle lights are off. In other words, it communicates a visible message that is easy for drivers to see and respond to. This communication facilitates highway safety, courtesy and peace of mind for motorists. Even better, it reduces the possibility of a collision leading to injuries, property damage or loss of life. At the same time, it eliminates the chances of a citation for violation of the motor vehicle code regarding automobile lighting. It is also eye-catching, effective and affordably priced. In addition, it is convenient, practical and user friendly.

The inventor's personal interests inspired the invention. "When I was driving and noticed many cars with lights out, I would try to signal the driver but, in most cases, I was not successful in getting his or her attention or got told off," he said. "I saw a need for a safe way to communicate this message."

The original design was submitted to the Sacramento office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SAH-1122, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
