

Inventor and InventHelp Client Develops Improved Car Seat for Young Children (TEN-105)

InventHelp, a leading invention firm, is submitting the ULTIMATE CHILD RESTRAINT to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 03, 2016 -- "On my granddaughter's first birthday, I had trouble getting her out of his child seat because it was difficult to unbuckle the seat belt," said an inventor from Franklin, Tenn. "I thought that a child seat could be designed to enable adults to get their children out more quickly and easily."

He developed the ULTIMATE CHILD RESTRAINT to allow the child to be removed from the seat quickly and easily. The design assists the adult with getting the child to safety in the event of an accident or other emergency. It eliminates hassles and frustrations. The unit provides added protection in the event that the vehicle is submerged in water. This is designed to enhance personal safety. Furthermore, the modified car seat offers added peace of mind to parents and caregivers.

The original design was submitted to the Tennessee office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-TEN-105, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
