

Inventor and InventHelp Client Designs Convenient Footwear Storage for Vehicles (TOR-9620)

A leading invention submission company, InventHelp is submitting the STEP LOCKER to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 04, 2016 -- An inventor from Toronto, Ontario, Canada, had a personal need for a better way to keep shoes and other footwear organized and stored in his car, but he didn't want to resort to inconvenient, cumbersome methods. "After some brainstorming I came up with the idea for the STEP LOCKER," he said.

This patent-pending device allows for convenient organization and storage of footwear in a vehicle. Besides providing easy access, it doesn't take up a lot of space. Now drivers and passengers needn't worry about where to put their extra footwear.

Versatile, easy to use, non-messy and non-cumbersome, the STEP LOCKER is producible in design variations and ideal for all vehicle owners.

The inventor has created a prototype of his idea.

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-TOR-9620, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
