

InventHelp Inventor Develops Comforting Children's Car Seat (CBA-3026)

InventHelp is attempting to submit THE COMFY RIDE BY ASHLEY to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) December 07, 2016 -- "I thought that car seats could be designed more comfortably so that children could get a more restful sleep on long road trips," said one of two inventors from Mc Cormick, S.C. "I came up with the idea for this enhanced car seat to support the child comfortably while sleeping."

They developed THE COMFY RIDE BY ASHLEY to support the child comfortably. This enables the child to get a more restful sleep. The design ensures that the child can sleep in a cozy position. It provides added peace of mind to parents and caregivers. The seat makes long road trips with young children more enjoyable. Additionally, the invention is usable in any vehicle. It also makes trips safer.

The original design was submitted to the Columbia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CBA-3026, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
