

## **ATV-Towing Aid Invented by InventHelp Client (CCT-3026)**

*InventHelp, a leading inventor service firm, is submitting the ATV DOLLY to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) December 07, 2016 -- As an ATV rider an inventor from Frankfort, Ky., had to struggle to get his ATV back to his trailer after breakdowns several times. He finally decided to design something that solves this problem in a simple, efficient manner: the ATV DOLLY.

This device provides an easier and safer way to tow a disabled or damaged ATV back to a trailer. It avoids struggle, strain and hassle, as well as saves time and effort.

Ergonomic, compact, portable, easy to use and producible in different colors, the ATV DOLLY is ideal for all ATV owners. The inventor has created a prototype of his idea.

The original design was submitted to the Cincinnati office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CCT-3026, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
