

Inventor and InventHelp Client Develops Comfort Accessory for Seat Belts (MTN-2666)

InventHelp is submitting the C.R.S.A. to appropriate companies for their consideration and possible feedback.

PITTSBURGH, PA ([PRWEB](#)) December 11, 2016 -- "I think seat belts are uncomfortable, which is why most people do not wear them," said an inventor from Yonkers, N.Y. "When I wear one, it crushes up my clothes and is just plain uncomfortable. To help people wear a seat belt more comfortable and safely, I invented this."

He developed the patent-pending C.R.S.A. to allow a seat belt to be worn more comfortably. The accessory prevents the belt from crushing or wrinkling clothing. The device promotes proper seat-belt use. This is designed to enhance roadway safety and offer added peace of mind. Additionally, it is adaptable for use with both new and existing vehicles.

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-MTN-2666, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
