

## **Inventor and InventHelp Client Develops Home Detailing System for Automobiles (OCC-1134)**

*InventHelp, based in Pittsburgh, Pa., is submitting this idea, the ALLROUNDER, to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) December 12, 2016 -- "I wanted to be able to wash and detail my car at home so that I could avoid having to pay other people to perform these services for me," said an inventor from Irvine, Calif. "I came up with this idea to provide a complete washing and detailing system for home use."

He developed the patent-pending ALLROUNDER to provide an efficient way to wash and detail an automobile. The system eliminates the need to visit a car-wash facility. Also, it saves the owner from having to pay for professional detailing. The accessory ensures that the vehicle looks attractive and stylish. It is safe for use with any car or truck. Furthermore, the invention sets up quickly and easily for use in a driveway or street.

The original design was submitted to the Orange County office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-OCC-1134, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
