

## **Inventor and InventHelp Client Develops Carrier for Propane Tanks (OCC-1161)**

*InventHelp, a leading inventor service company, is submitting the EASY HAULER to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) December 13, 2016 -- "I needed a better way to carry two propane tanks at once," said one of two inventors from Corona, Calif. "These tanks are heavy, bulky and awkward, which is why I came up with this accessory to allow for hassle-free transport of two tanks."

They developed the EASY HAULER to offer a convenient way to carry two propane tanks. The design ensures that the individual has a secure hold on both tanks. The device saves time and effort when transporting propane tanks. It also prevents tanks from shifting or rolling around the vehicle while in transit. The accessory reduces physical stress and strain. Furthermore, the invention is adaptable for use in any vehicle.

The original design was submitted to the Orange County office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-OCC-1161, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
