

## **Improved Childcare Safety Device Invented by InventHelp Client (PHO-2311)**

*InventHelp, a leading invention company, is submitting the KID SAVER to appropriate companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) December 13, 2016 -- An inventor from Phoenix, Ariz., wanted a way to prevent injuries and death to young children left unattended in motor vehicles. As such, they invented the KID SAVER for use by caregivers. The KID SAVER reminds the driver when a young child or baby is left in the back seat.

The inventor was inspired by frequently hearing stories in the news about heat-related child deaths as a result of being forgotten in a vehicle. "I thought there had to be a way to prevent such tragedies." The invention is provides peace of mind for busy parents by increasing safety for babies and young children. It also safeguards children transported by child care facilities or day care providers.

The original design was submitted to the Phoenix office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-PHO-2311, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
