

Prevent Children from Being Left Behind in Vehicles With THE GUARDIAN ANGEL - Designed by InventHelp Client (AUP-713)

Based in Pittsburgh, Pa., InventHelp is submitting THE GUARDIAN ANGEL to companies in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) December 16, 2016 -- "No child should ever die in a hot car, and with THE GUARDIAN ANGEL on board this should never happen again," said a concerned inventor from Corpus Christi, Texas, after hearing about the loss of many children's lives due to the serious error of leaving them behind in hot vehicles. He decided to develop a system that combats this senseless tragedy.

THE GUARDIAN ANGEL serves as reliable prevention of child fatalities in hot unattended vehicles. It keeps parents and guardians from leaving children behind in vehicles, which promotes safety and peace of mind.

Versatile, easy to use and producible in a version for booster seats, THE GUARDIAN ANGEL has more than one "layer" of protection, making it ideal for all parents, guardians and caregivers of children.

The original design was submitted to the Austin office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-AUP-713, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
